

HealthCare[®] Europe

Molded Pillows catalogue

About us

HealthCare Europe doo was established 2012 in Novi Sad, Serbia, as a daughter company of a Chinese memory foam production giant HealthCare Co. Ltd. Factory is placed in Ruma, Republic of Serbia, on nearly 30.000 m² and supplies European markets, Russia, Middle east and North Africa.

We are a modern and rapid-growing company, that produce memory and standard foam products. Currently, we are producing a wide spectrum of foam with different density and firmness that can please every sleeping and resting demand. We also produce a special environmentally friendly foam such as air foam, gel infused foam, bouncy foam, bamboo

charcoal infused foam and other. HealthCare portfolio is consisted of various types of pillows, mattresses, toppers and accessories.

In order to keep pace with the newest technological achievements, but also to keep constant improvement, HealthCare Europe doo formed a strong team of creative and experienced professionals that grows every day in pursuance of creating more innovative, superior quality and highly recognizable products for our customers.

Thanks to our prestige brand MLILY we are conquering the market all over the world, and becoming new synonym for quality sleep.

We are
innovative

We are
global

We offer
the best value

We are
solid and growing

Our spectrum of services is very wide - starting with developing our own equipment in HealthCare Ltd to creating finest sleeping solutions. In both factories, HealthCare Ltd and daughter HealthCare Europe, we are making our own foams, cooling them, peeling, cutting, molding

and mincing them, we design, tailor, over-edge, saw and quilt our products in order to get a perfect final result.

Closed production cycle increases our efficiency and helps us control our costs at every step of production.

We have:

- More than 10.000 T annual foam blocks production
- More than 85.000 molded pillows produced per month
- Sophisticated equipment that allows us permanent improving
- A strong team of experts and all technical conditions for formulating that helps us make high-quality foam
- Most quality fabrics that we sew, quilt and process so we can offer our customers very wide product assortment

We are very proud to present every single product, such as those made of molded, cut or shredded foam, or those with cool comfort gel, flow ventilated foam, foam quilted in cover, cooling gel infused, etc. All of them, no matter which foam are made of, are body-friendly and ergonomically shaped so they can fit different types of sleepers.

Of course, we also care about fabrics we use in order to offer our customers best of the best, so we use high-quality fabrics with amazing effects such as Aloe Vera, Bamboo fiber, Silver Care fabric with silver ions, pure cotton, etc.

Your total OEM and PL solution

Healthcare Europe doo is a development partner and OEM producer for many valuable Brands.

We can become your one-stop solution, from design, layout, product structure, component sourcing, to testing and warranty.

Foaming or foam molding is very complex process, managed by the most advanced robot line technology. The foam chemical components have to be precisely mixed and injected in a prepared mold. After a residence time, foam is removed from mold and ready for final curing time.

The unique production technique that includes high-quality molds allows us to produce an identical shaped pillow with perfect contours and edges.

Unlike the products made from slab foam production, mold foam pillows do not have to be cut from a block, glued or additionally treated.

All molded pillows are made of high density foam, which makes them ultra-adjustable, very supportive and smooth.

All mold pillows are made from 40 kg/m³ density foam or even higher density.

Foam molding is the only way to create different pillow shapes that can provide multiple benefits such as smooth edges and

various curves that could be used in many purposes.

Molded pillows are extremely durable, suitable, and above all- comfortable.

Our production capacities are more than impressive: 1.800 pillows during one shift and 85.000 molded pillows per month.

HealthCare Europe possesses 320 molds which may produce 9 differently shaped memory foam pillows.

Also, we can mold travel pillows in different sizes, cushions, lumbar, anti-snore pillows, super breathable pillows with holes, contour pillows, soap pillow and many more.

Every single product has been tested and controlled according to the highest international standards.

Foam pressing hardness, resilience, permanent deformation and foam stretch are just some of numerous tests that our products have been exposed in order to provide the best possible quality.

Our production offers OEM service through ISO 9001 certified processes.

Healthcare Europe is granted by CertiPur for complete range of PU foams.

Also, we are the holder of Oeko-tex certificate that covers all our final products including PU foam as well.

01

Dimension:
42x24x13 cm

Classically shaped mold memory foam pillow is an ideal solution for all side sleepers, especially for those who prefer an optimal balance between support and comfort.
