

MLILY®

SLEEPING COLLECTION

RELIEVE PRESSURE, SLEEP BETTER

MLILY® PROVIDES GOOD SLEEP WORLDWIDE

MLILY® is an international brand specialized in developing, producing, and selling comfortable sleeping products made from unique and innovative materials. The one-of-a-kind MLILY® Mattress and Pillow range is revolutionizing the bedroom. By improving the quality of sleep, we are changing the lives of millions of people all over the world. Millions of customers are the proof that we are on the right track. Experience MLILY® - and find out how our mattresses and pillows can change your life... forever.

WAKE UP ENERGIZED AND STRESS-FREE

Sleeping well directly affects your mental and physical health. Sleep deprivation can take a serious toll on your daytime energy, productivity, emotional balance, and even your weight. The right mattress is vital for our wellbeing. Relaxed body equals relaxed mind. Mattress that offers you the proper support enables you to fall asleep faster, sleep deeper and wake up rejuvenated.

MLILY® is an innovator and expert in the constant development of the best sleep solutions for deep relaxation of the human body. Studies have shown that **MLILY® pressure-relieving mattresses** can increase the average deep sleep time of the overall population by **13%**. On the other hand, they can increase the deep sleep time of people over 50 years old, who have higher adaptability and sensitivity to memory foam mattresses, by **23.3%**. Even better, the researchers found out that sleeping on **MLILY® pressure-relieving mattress** can reduce the average fall asleep time of the overall population by **49%**. For people over 50 years old, this time can be reduced by **65.77%**.

OUR RESPONSIBILITY

MLILY® products have acquired all necessary certificates, including CertiPUR®, OEKO-TEX®, and many others. All our foam types comply with the most demanding standards and regulations applied in different markets.

Besides product certificates, our company also complies with the BSCI Code of Conduct. The BSCI certificate confirms that our company is committed to the principles set out and meets, within its sphere of influence, its responsibility to respect human rights.

OEKO-TEX®

SECURITY IS CERTAINLY A GOOD FEELING!

MLILY® products have an OEKO-TEX® label. They are free of harmful substances that may pose health issues. We spend a third of our lives sleeping thus this time shall be as revitalizing and as healthy as possible. During our lifetime, human body is in constant contact with textiles used in various forms from clothing, linen to fabrics, for the purpose of the interior decoration in our homes. Isn't it good to know that textiles - whether made of natural or synthetic material - do not have any substances that could harm our health? When you go shopping, be 100% sure to look for safety and transparency label that says "Reliable textile" tested for harmful substances according to OEKO-TEX® standard.

• AirCell® memory foam

AirCell® memory foam provides the ideal balance of conforming support and pressure-relieving comfort. Helps increase blood circulation, allowing muscles regeneration and diminishing tossing and turning during sleep. It instantly conforms to the body's contours, providing exceptional support while simultaneously relieving pressure.

• CoolFlex® foam

The CoolFlex® foam adapts to your body, relieves pressure, and responds to the individual movement for ideal comfort. It regulates your sleeping climate through breathable and ventilated holes. Enhanced breathability and ventilation play an important role when it comes to the quality of sleep: both contribute to lower temperature (avoiding overheating), which makes cooler and more comfortable sleeping environment. A more dry and fresh sleeping environment contribute to better hygiene. Prolongs the longevity of the product and it ensures longer and better sleep.

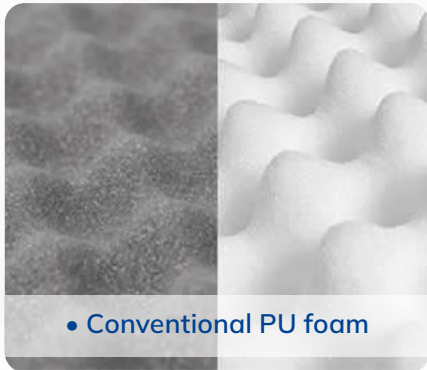

• Smart foam®

The specially engineered Smart® foam is breathable, flexible, and effectively adapts to the body's natural contours. It provides all the benefits of natural latex. Smart® foam ensures a more comfortable, restful night's sleep.

• BraceSleeper™ foam

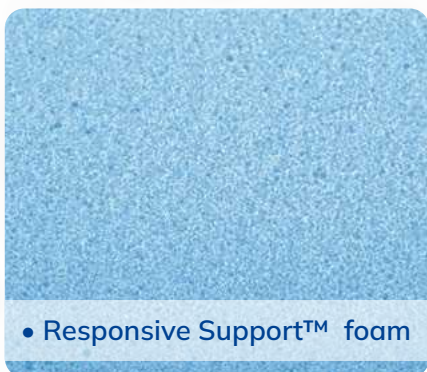

BraceSleeper™ foam has a higher density, which makes it more durable and long-lasting. It maintains its structural integrity over time, reducing the need for frequent replacements. The premier cushioning and resilience ability provide effective pressure relief, making it suitable for applications that require even weight distribution and foundation support.

The embossed egg pattern made of Conventional PU foam provides additional plushness to the above layers. It offers not only uniform support but also airflow to lower the temperature of the surrounding foams.

Our Blue Flow™ foam has been especially developed to guarantee point adaptable support and remain permanently elastic. It mixes durability, flexibility, and adaptability qualities in a single foam.

Responsive Support™ foam it is more breathable, thus maintaining a fresh sleeping environment. It's more elastic and will conform to your body's unique contours, thus providing point-adaptable support. Durable and will maintain its shape during the mattress's life span.

We use different spring systems to provide enhanced support. For example, our individually pocketed spring system provides positive, tailored support in response to the dynamics of the sleeper's position while minimizing disturbance between co-sleepers. Our 7-zoned springs system targets the body's seven key pressure points and distributes pressure accordingly, promoting proper spinal alignment.

MLILY®

GLOBAL PARTNER OF MANCHESTER UNITED

The Partnership of Dreams

On May 16, 2018, we agreed to extend our global partnership with Manchester United to an unprecedented 10 year deal. This landmark move cemented our relationship with a powerhouse football brand and further unified our collaborative efforts between the sleep and athletic industries.

Since our original 2016 deal, we have developed the Sleep Performance Suite at United's Carrington Training Complex. We have also equipped United players and coaching staff with our state of the art mattresses. Our extensive efforts with United's Recovery & Regeneration Team have now led to the implementation of new innovative studies and technologies.

Our collaborative marketing campaigns have continued to grow our brand fame and awareness globally as we look to position ourselves at the forefront of the sleep industry.

AIR Mattress

DESIGNED WITH THE ENVIRONMENT IN MIND

- Marine litter from our beaches, found on the ocean floor and surface, or entering our oceans via rivers and estuaries is collected by clean-up programs
- It is then sorted into different material types
- The plastic portion is cleaned and transformed into SEAQUAL® MARINE PLASTIC at SEAQUAL INITIATIVE approved facilities
- It is then returned to the industry to be transformed into beautiful, new, sustainable products
- As a partner of SEAQUAL INITIATIVE and in order to support ocean clean-up, MLILY® developed a sustainable collection of products called AIR
- Beautiful cover with SEAQUAL® YARN, used for our AIR collection, has a very soft-to-the-touch feel and remarkable ability to allow air to flow easily
- Fabric with SEAQUAL® YARN offers comfort, function and durability

Graphene Technology

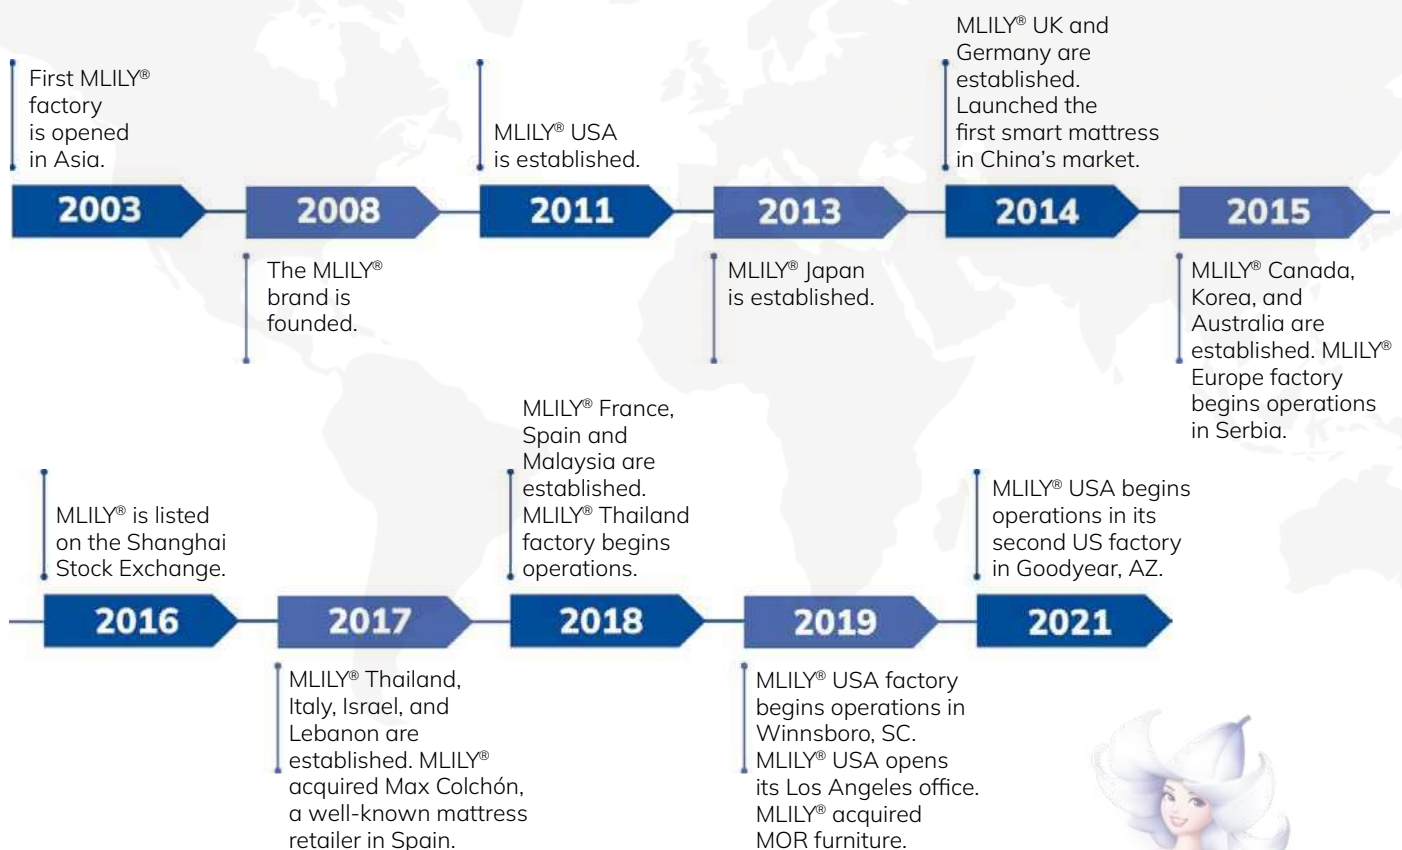

BRAND HISTORY

Founded by Mr. Ni Zhanggen in 2003, MLILY® is a world-leading mattress brand. With the mission of improving people's deep sleep, MLILY® has focused on the research and test of mattress materials for more than 10 years, obtaining patents in China, the United States, Canada and other countries. The core products are made from unique AeroFusion™ memory foam material, of which the quality does not change with the external temperature, providing users with the same comfortable sleep experience under different weather conditions. Besides, they fit completely with the natural contour of human body and evenly relieve pressure to reduce turning over times, shorten fall asleep time and improve deep sleep.

MLILY® has six production bases in China, Serbia, the United States, Thailand and Spain. The products sell well in 73 countries and regions, such as China, America, Japan and Britain, with more than 5,000 global retail locations.
